

0. CLASS OPENING & ADMIN

- Class date: **30th** (teacher says only "30"; month/year taken as **30 Sept 2026** from context: COFO-28 runs 28 Sept–2 Oct, Asian Games end 3 Oct) (verify)
- Scope: all important current affairs up to this morning. Audience includes **SSC Selection Post and Steno** aspirants.
- SSC CGL exam starts today.** Teacher wishes all candidates the best and hopes for smooth exam centres. Candidates must **send the exact questions** after the exam ("don't turn Ghajini") so that others can prepare for later shifts/days.
- Class PDF is on Telegram.** Stay till the end: she announces the analysis timing then (analysis sessions are 10–15 min).
- Student asked why the app needs re-login every 2 days; teacher does not know (maybe new security rules) and will ask.
- Motivation: **never stop trying**; even the last key can open the lock; the last attempt can bring success.

1. SPACEX – FLIGHT 14 REACHES ORBIT (SPACE)

Q: SpaceX's Starship/Starlink programme has recently reached where (first time)? **Ans:** orbit (**Low Earth Orbit**).
[teacher mixes up "Starling/Starlink" and "Starship"; *Flight 14 is a Starship test flight*]

- SpaceX** = private US company of **Elon Musk** (teacher: Musk became the **world's first trillionaire**(verify)). Its rocket **Falcon 9** carries heavy satellites easily.
- Project started **2023** (as per teacher(verify)).
Objectives: (1) faster internet connectivity, (2) take people to **Mars**, (3) take people to the **Moon**. Earlier launches repeatedly failed (went up and came straight down).
- New mission named **Flight 14** (14th mission) **successfully entered orbit – first time ever.**
- Main aim: a **trial** to see whether future crewed Mars/Moon trips can succeed. Rocket used is **reusable**.
- India angle:** Musk wants Starlink in India. India already has Airtel, Reliance, BSNL, Vodafone and **5G**; entry possible if Starlink follows Indian rules and does not hurt internal markets. Future cooperation possible – time will tell.

FLIGHT 14 – QUICK FACTS

Launch site: Texas, USA | **Payload:** 26 next-gen satellites + **V3 satellite** (question may come)
Planned duration: 10 hours | **Altitude:** 275 km
